

OnIzed Shipping Cases

A complete shipping case service is available for distillers and vintners including both single and double wall corrugated and solid fibre board, as well as wood cases. Corrugated meets all the required government specifications and, as with other glass packed goods, makes an ideal shipping carton. These sturdy, light weight cases may be attractively imprinted. The cases shown above are examples of effectively imprinted designs.

Old and New Friends

THE selection of containers for the new products of distillers and vintners requires keen judgment and is particularly important because of the emphasis now being placed on package design. In this day the public, as never before, is package-conscious and if it is to be outstanding, any package must be attractive in appearance and practical in function.

Naturally, distillers' and vintners' first thoughts were of bottles familiar in the pre-prohibition era. Such famous names and styles as "Hock Wines," "Chicago Fancies," "Alton Brandies" and numerous others have been revived and are commanding their old time popularity.

This is true because these old "standbys" were practical shapes and styles for wines and liquors, and had definitely proven themselves as such. When blown of sparkling OnIzed glass the beauty of these "old timers" is much enhanced and they perform brilliantly in either flint, amber, light green or dark green glass.

However, this is also an age of strenuous competition and marketing conditions have changed greatly since 1920. Any container must do much more of a sales job than was previously demanded of it, for which reason many questioned the advisability of exactly duplicating old time shapes and styles. To meet this condition the creation of new designs more in keeping with modern trends is essential.

By drawing upon the rich, fertile background and adding original touches, designers are enabled to produce what may be termed strictly modern containers. Achievements in recent years in package development give these new designs many outstanding advantages. Distillers and vintners who choose to adopt these bottles place their product in packages comparable to those of other merchandising leaders of the day.

DRUGGISTS SPECIALTIES

Crystal gazing is recognized as the art of a seer but from the crystal walls of an Owens-Illinois Prescription Oval, anyone can see reflected visions of health and happiness. Visions of pain relieved—of bodies stengthened—of minds cleared — the result of prescribing and the proper administration of healing drugs and chemicals which myriads of bottles have safely carried to men everywhere.

There Is No Substitute For Glass

The uses to which it is put are so common and diversified that few people realize the important role which glass plays in our daily lives. Like the derivatives of coal tar, glass is indispensable to pharmacists and doctors and they have a keen regard for its many virtues.

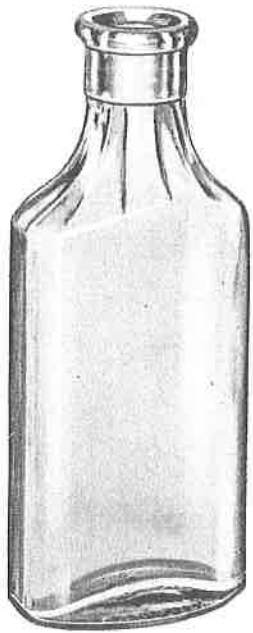

For Centuries, glass in the form of bottles has conveyed healing potions to the couch of the indisposed and the bedside of the ill. Bottles are an invaluable adjunct to all agencies which preserve the health of the nation. Within their cleanly walls drugs maintain their potency—volatiles are kept securely imprisoned—amber and other dark colors preserve preparations to which light is injurious.

In no other more than the Drug Industry, has an honest effort been put forth to better production methods, maintain accuracy or improve packaging and service.

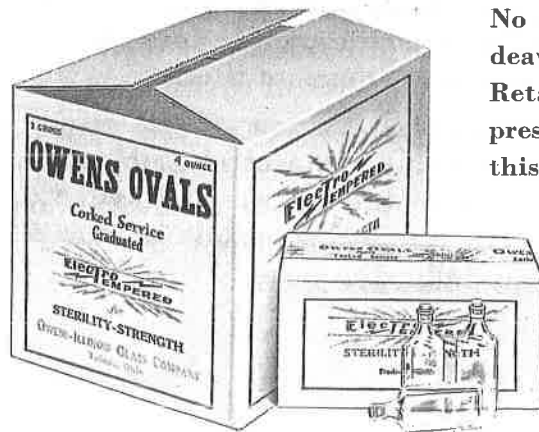

Prescription bottles are made of the very highest quality of glass. No effort is spared to make them sterile and keep them so. Cartons for their packing are of the most modern type—convenient in size, light in weight and withall, strong and sturdy. Graduation marks are exacting for all reasonable purposes, cork and screw cap finishes are positive, pourouts leave nothing to be desired and label spaces are ample and smooth.

More than a million gross of Owens and Illinois Prescription Ovals are distributed annually to Retail Druggists throughout the land and the universal favor with which they are received is fine tribute to their innate quality and the excellent service back of them.

Owens-Illinois are keeping abreast of the times by providing their Druggist friends with well chosen specialty items which enhance profits and create goodwill. Comprehensive word pictures and illustrations of the Prescription Line are on the following pages.

OWENS OVALS
(STOCK)

No detail is overlooked in our endeavor to place in the hands of the Retail Druggist the most perfect of prescription bottles. To accomplish this, cartoning is an important factor and Owens-Illinois Prescription Cartons have no equal. Both Inners and Outers are made from genuine Kraft Corrugated Paper which has a reputation for unusual strength.

With all their sturdiness Owens-Illinois cartons are light in weight and correspondingly easy to handle. Their size is convenient and markings plain. For broken case lot shipment the small inners are practical. Being dust proof they afford excellent mediums for storage until the bottles are needed by the pharmacist or dispensing physician.

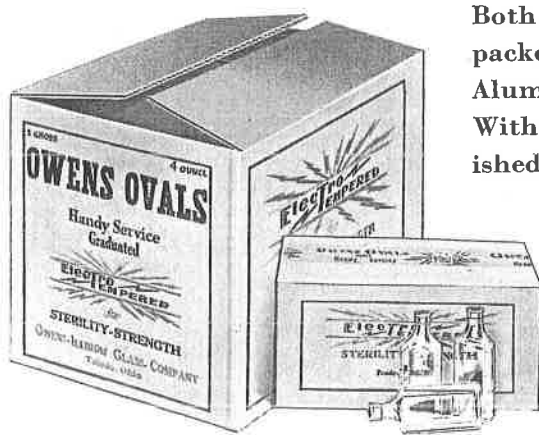

OWENS OVALS
(STOCK)

Both Owens and Illinois Ovals are packed in three services—Corked, Aluminum Screw Cap and Handy. With the corked services are furnished a good grade of extra long taper corks. In the Aluminum Screw Caps are alkali proof liners preventing rust and corrosion. The Handy Service comprises bottles without corks or caps. Illinois Ovals are also available in wood cases.

Ours is the age of specialization and in all walks of life efforts are directed to that end. Fortunately the Owens-Illinois Prescription Ware volume is sufficient to keep one of our large plants constantly at work on Prescription Ovals and supplemental services. The result is a degree of perfection in bottles and packing otherwise obtainable.
