

**ILLINOIS
OVALS**
(STOCK)

One of the chief advantages of specialization in prescription ware is "hard glass." It is more brilliant than ordinary run of production and at the same time it resists chemical reaction more effectively. Prescription ware may conceivably be in storage a considerable period before use and is essential that regardless of how long made, it be and look clean when needed.

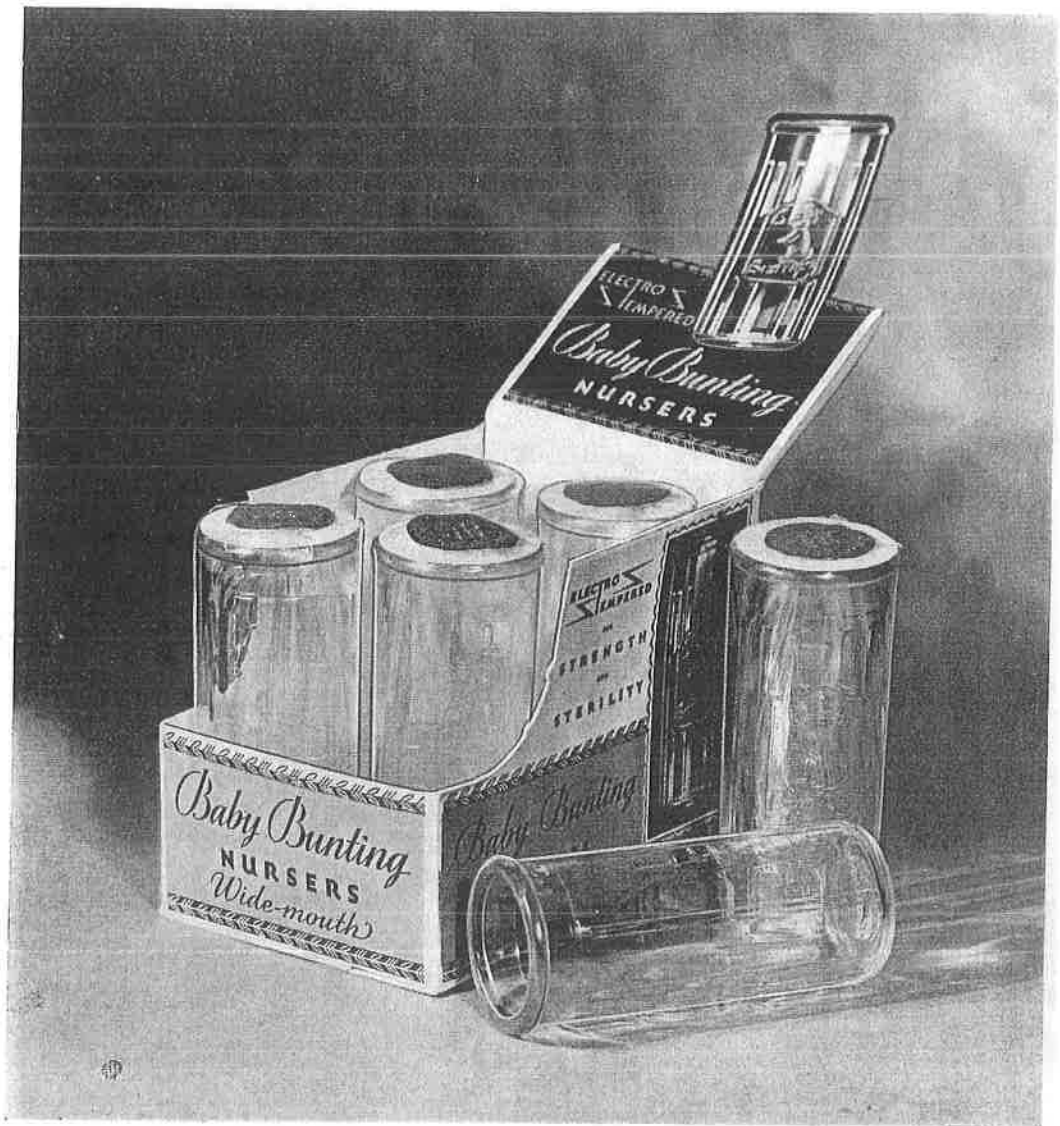

But hard glass is more difficult to blow, requires considerably more heat in melting (2720°) and is therefore more costly. It is obvious that only a specializing plant could produce the best of prescription ware and at Gas City is the only plant in the world whose efforts are devoted entirely to the Prescription Line. Owens-Illinois Prescription Ware is the World's finest.

R 80 A-4057	8	7	5 ¹ / ₃₂	5 ³ / ₈	2 ⁷ / ₃₂	Nipple	1 ¹ / ₂	39

ON this and the opposite page are illustrated the famous "Baby Bunting" Nursers both Wide Mouth Round and Non-Rolling Narrow Mouth Oval. They represent Owens-Illinois contribution to the care and physical comfort of new generations.

Each is wrapped in moisture and dust-proof cellophane assuring mother of cleanliness and sterility. The ribs on the bottle sides provide a grip for baby and add to its stability.

Baby Bunting nursers have an improved finish which facilitates the application and removal of rubber nipples—their graduations are accurate—their design is attractive.

**BABY
BUNTING -
NARROW
MOUTH**
(STOCK)

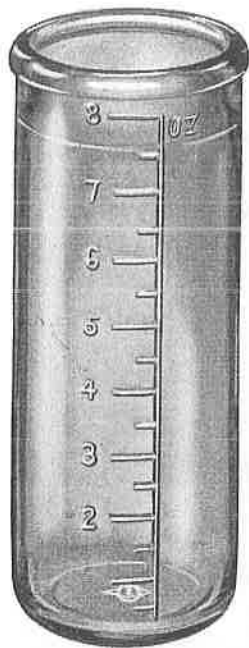

RETAIL Druggists find the counter display cartons in which six wide mouth or twelve narrow mouth nursers are packed to be definite aids in selling. The sparkling cellophane wrapping catches attention, and carries the proper air of consideration to baby needs.

Baby Bunting nursers are blown from the same hard glass of which prescription bottles are made and are electrically tempered for strength. They clean easily and admirably stand the shocks of heat and sudden cold in sterilization.

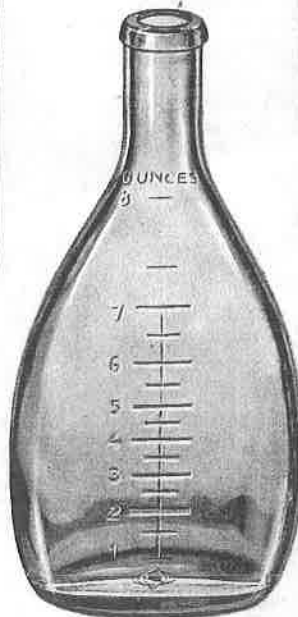

The nurser market is unusually consistent and retailers find Baby Buntings very profitable.

PEOPLE are likely to accept the manner in which a pharmacist labels and wraps his prescription as a measure of the care in which it was compounded. So it is with bulk medicinals such as iodine and mercurochrome which it is customary for retailers to fill and display.

The Owens-Illinois DeLuxe Dropper Service provides just the right touch and sends a customer from the pharmacy full of respect

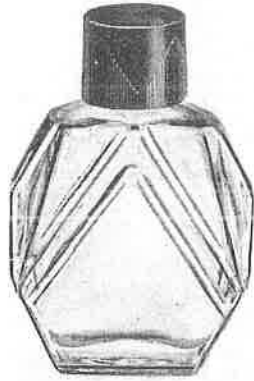

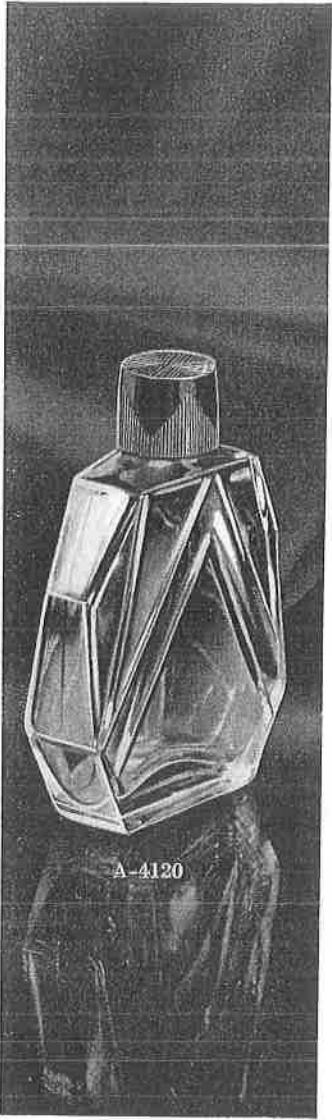

for the institution and in the right frame of mind to return again.

The DeLuxe Dropper Service consists of $\frac{1}{4}$, $\frac{1}{2}$, 1 and 2 ounce Amber Squares, packed individually in attractive blue and silver slide type boxes, complete with flint glass "Ball End" Pipette fitted with red rubber stopper. Individual boxes are packed in units of twelve.

The Owens-Illinois Regular Dropper Service is a pleasing contribution to druggists' convenience and profit. The individual carton in which each bottle appears is nicely turned out and makes a very acceptable package. No druggist need hesitate to dispense dropper preparations in either the bottle or its container.

The Regular Dropper Service consists of $\frac{1}{4}$, $\frac{1}{2}$, 1 and 2 ounce Amber Squares, packed individually in a nice appearing tuck end box, complete with flint glass "Ball End" Pipette fitted with red rubber stopper. Individual boxes are packed in units of twelve.

These Handy Flacons of six and twelve-ounce capacity are pleasing druggists as quick turnover, long profit merchandise. Each is fitted with a Bakelite Cap having a natural cork liner.

Many druggists are using Handy Flacons as a merchandising feature in dispensing bulk lotions. The Display Carton in which they are packed has real merit and returns substantial profit when placed conspicuously on a counter.

TEA TIME SALT and PEPPER SHAKERS

C-160 with Red, Green or Nickel Tops.

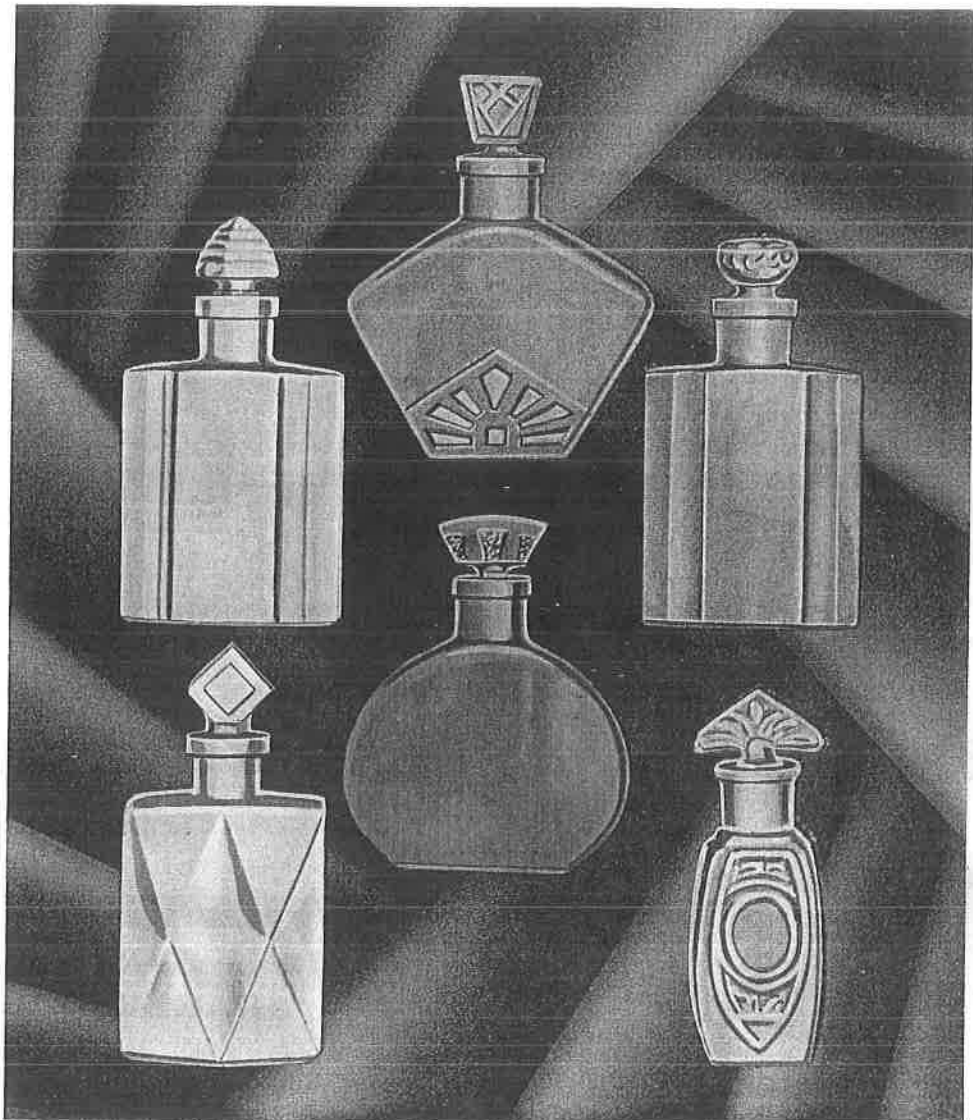

SHAKERS (STOCK)

From the moment of their introduction, Owens-Illinois "Tea Time" salt and pepper shakers have been popular. They are useful, practical in design and of no less importance, they meet the day's demand for color.

Tea Time shakers add the finishing touch in which women delight. Their colors, blue, yellow, coral, peachblow, green or black, have the all essential "eye appeal" and harmonize with the breakfast or dining room fittings and decorations.

Tea Time shakers have non-corroding Aldur caps and are packed each set of two in a smart gift box, one dozen of which comprise the attractive counter display illustrated above.

APPLIED COLOR WARE

Above are illustrated only a few of the many "Applied Colors" which it is possible for us to produce. Also, but six are shown of the hundreds of molds available. Colors can be applied to any style of bottle or jar—perfume, toilet ware or cold cream.

These beautiful translucent colors are thoroughly modern and add distinction to the package while creating the desired impression of high quality. Applied Color Ware is worthy of serious consideration for any toiletries which you produce.

Boric Cotton Powder Baby Oil Swabs Nipples

Baby Bunting Layette Sets possess an irresistible sales appeal. They bespeak the loving atmosphere surrounding everything which has to do with Baby.

These jars are attractively designed of frosted glass with pink or blue Aldur Caps. In color harmony with the caps, the little nursery book animal figures are cleverly arranged to present a cheerful appearance. As practical in use as they are arresting in design, Layette Sets are dominant among Baby's new possessions. Sales are sure and profits liberal.

The silver metallic labels are unattached. Four sets of six labels are included in every carton of two dozen jars with a dozen each of pink and blue caps. Specifications including caps are:

Emerald Green Ointment and Cream jars have a distinct appeal as quality containers. They are colorful, being blown of beautiful emerald green glass and topped with smart black metal caps. Stippled walls beautify the package, make labeling easier and add to the opaqueness of the glass. The strong metal closures are lined with aluminum, eliminating the possibility of corrosion. The entire line exemplifies the modern packaging trend.

Emerald Green Capsule and Tablet Containers solve the problem of packaging dry prescriptions. They are both attractive in appearance and practical in use. The black molded cap provides an air-tight seal which is essential to the proper packaging of capsules and tablets. These containers are permanent and preserve the effectiveness of dry prescriptions.

Show Globes, the ancient symbol of the apothecary, are again becoming prominent. Our modernized globe, Mold CH-4026, is in keeping with present day drug store fixtures and when filled with brilliantly colored liquids presents a striking display, symbolic of the age-old and honorable profession. The globe is packed in an individual carton complete with fixtures for either ceiling, wall bracket or standard type.

The most recent addition to the popular, ethical Emerald Green prescription containers, is the new line of Powder Jars. These jars are both attractive and practical. The wide mouth opening of the 4, 8 and 16 ounce size is large enough to admit a teaspoon, the measure generally used for powdered prescriptions. Black metal caps provide air-tight seals.

The DeLuxe Iodine Service has many new distinct advantages. Most important is the improved seal that is effected by means of the molded cap. Because the seal is more permanent it assures the preparation is continually fresh. As illustrated, the applicator rod is fitted into the cap, allowing the contents to be dispensed without soiling the fingers.

Included in each carton of the DeLuxe Iodine Service is an attractive counter display carton and a generous supply of Iodine labels.
