Test Glasses	108	Wine Bottles	19, 40
Test Jar, Cylindrical	72	Yeast Powder Bottle	39
Test Set for Urinary Analysis	108	Zincs, for Batteries	135

In issuing our Annual Price List for 1913, we take pleasure in greeting all of our old friends, and soliciting the acquaintance of any who have not as yet had dealings with us.

The Book is issued July first, instead of January first as heretofore. It is revised to date, and shows a number of new and attractive items not previously listed.

DISCOUNTS.

Most of the prices herein given are subject to discount. Discount sheets will be furnished to the trade upon application.

TERMS.

Payment in funds at par in New York or Philadelphia.

In order to facilitate prompt shipments, first orders from those who are not rated by the Mercantile Agencies should be accompanied by references. We cannot ship C. O. D. to parties unknown to us.

We pack carefully, and ship goods in a merchantable condition, and our responsibility ceases with the signing of the Shipping Receipt. Claims for missing packages, overcharges in freight, or unusual breakage, should be made to the transportation companies.

ORDERS FOR SUMMER STOCK.

During July and August, owing to the heat, but little Glass is made. It is therefore essential that our customers, in order to procure a stock of Glassware to meet their wants during the Summer, should so far as practicable send in their orders in the early Spring.

GLASSWARE.

For many years our Glassware has held the first place in the market, and has been generally accepted as the standard of excellence.

Through close selection of materials and care in all branches of manufacture, we insure an even production of bottles which have never been excelled in strength, color, and design, or equaled in regularity of weight, content, and finish.

Besides our regular qualities of Flint, Green and Amber Glass, we make Blue and Opal. Many articles on our List can be made in any of these colors.

Correspondence is invited in regard to any special articles of Glassware that may be wanted.

STOPPERED WARE.

Having long made a specialty of STOPPERED WARE, we have entire confidence in recommending our output as thoroughly reliable for essences and volatile fluids, or for packing with liquid contents, as every bottle is carefully tested before it is sent out.

Each glass stopper is ground into the bottle for which it is intended, and will fit no other bottle satisfactorily.

PRIVATE MOULDS.

The manufacture of Private Moulds for customers who desire bottles of special shapes or sizes is a considerable branch of our business, and we are prepared to execute orders on favorable terms.

The advantages are many for making moulds at a Glass Factory, where experts know the special requirements necessary for delivering smooth and regular bottles. When desired, samples can be blown and forwarded before lettering or finishing up the mould, so as to allow of modification of style.

Moulds for Insertion of Lettered Plates.

We have a large line of Moulds arranged for the insertion of Lettered Plates, whereby the expense of entire New Moulds for producing Lettered Bottles of our regular styles can be avoided.

Special designs, with devices, monograms, etc., will be sent for selection or approval without charge. See designs for lettering, page 8.

The same plates fit the moulds for Acme Prescriptions, Colonial Oblongs, Neilsonia Ovals, Pharmacy Ovals, Phenix Prescriptions, Orient Ovals, Philadelphia Ovals, Manhattan Ovals, Baltimore Ovals, Knickerbocker Ovals, Millville Rounds, French Squares, and French Squares Wide Mouth, and ware of all of these styles can be ordered from the same engraved plate. Other styles require special plates.

STOPPERS.

The following cuts show our leading styles of Stoppers. While each stoppered bottle catalogued has its regular style of stopper, other styles can often be substituted to meet special requirements.

701
Mushroom Tincture.
All sizes.

702
Ball.
All sizes.

703
Flat Head or
"Hand Made."
All sizes.

704
Square Head.
 $\frac{1}{2}$ oz. to quart.

705
Lubin.
 $\frac{1}{2}$, 1 and 2 ounce.

706
Tall.
 $\frac{1}{2}$ oz. to pint.

709
Mushroom
Saltmouth.
All sizes.

712
Carmine.
All sizes.

717
Pear.
 $\frac{1}{2}$ oz. to pint.

718
Medicine Chest.
1 and 2 oz.

720
Table.
1 and 2 oz.

722
Club Sauce.
 $\frac{1}{2}$ pint, pint, and
quart.

724
Flat Hood.
Tinct. 1 oz. to gallon.
Salt M. 1 oz. to quart.

725
Oblong Head.
For Saltmouths.
All sizes.

727
Globe Hollow.
All sizes.

728, 732, 733
Tall Hexagon.
2, 4 and 8 oz.

734
Hollow, Flat, Cut.
1 oz. to 2 gallon.
Tinct. and Salt M.

763
Heavy Top
Mushroom.
 $\frac{1}{2}$ oz. to quart.

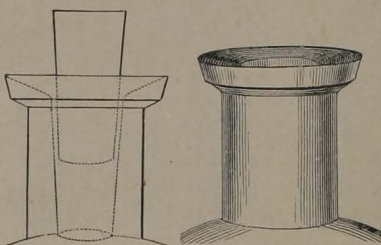

773
Diamond Head.
1 ounce.

FINISH.

In the manufacture of bottles at our factories, special attention is given to the forming of the lips and mouths, and our ware has always been noted for its smooth and uniform finish. In any package of bottles made by us, the mouths will be found to run exactly alike, so that one size of corks will fit them all.

STYLES OF FINISH.

When ware is desired with a different finish from the standard style, it should be distinctly indicated as below.

Prescription Lip; a flaring mouth, with thin edge, suitable for dropping.

Wide Prescription Lip; extra wide and thin, as on Reagent bottles.

P. L.; "Patent Lip," square and flat on top.

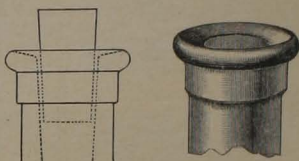

Deep Lip; a flat patent lip, as on English Essential Oils.

Double Ring; as on Citrate of Magnesia Bottles.

Blow Over; ground off, without lip.

Reinforced Lip; rounded, to avoid chipping, and strengthened by a ring below the lip. A favorite finish for prescription bottles.

Wine Finish; as shown in cut.

Ring; a finish such as is generally used on Castor Oils.

Extract Lip; used on bulk and small extracts.

Double Extract Lip; a neat and practical finish for patent medicines, etc.

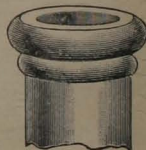

TABLE.

Showing the number of DOZEN usually packed in each Original Package of Bottles.

	3/8 oz.	1 oz.	2 oz.	3 oz.	4 oz.	6 oz.	8 oz.	10 oz.	12 oz.	16 oz.	24 oz.	1 qt.	3 pt.	1/2 gal.	1 gal.	2 gal.

4 ounce	2 dozen.	10 dozen.
6 ounce	1/2 dozen.	2 1/2 dozen.
8 ounce	1 dozen.	5 dozen.

Bottles not noted in the above list are generally packed in cases of about the same content as ware of corresponding sizes.

We cannot make less than an "Original Package" of any size lettered ware.

FLINT GLASSWARE.

PRESCRIPTION BOTTLES.

NARROW MOUTH.

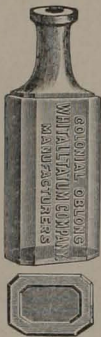

LETTERED PRESCRIPTION WARE of the finest quality and workmanship has long been with us a leading specialty, and we are prepared to furnish it in many attractive styles. The appearance of a prescription makes an impression that a druggist can ill afford to ignore, and our customers may depend on receiving well made and handsomely lettered bottles that will do them no discredit.

See designs for lettering, page 8.
Special designs submitted without charge.

Popular sizes of unlettered Colonial Oblongs, Pharmacy Ovals, Neilsonia Ovals, Knickerbocker Ovals, Philadelphia Ovals, Manhattan Ovals, Short Blakes, Tall Blakes, French Squares, Round Prescriptions and Boston Prescriptions are generally carried in stock for prompt shipment; other styles of Prescription Bottles listed can be made specially to order in original package lots.

FOR QUANTITIES IN ORIGINAL PACKAGES, SEE PAGE 11.

With the exception of Orient Ovals, all of our Prescription Bottles, measured to base of neck, hold slightly over their named capacity.

COLONIAL OBLONGS.

MOULDS TAKE LETTERED PLATES.

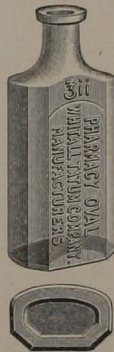

A handsome style, tall and large looking. The sides and chamfered corners form an octagon, which gathers and reflects the light, displaying the contents to great advantage.

While primarily designed for a Prescription Bottle, the Colonial Oblong makes an attractive container for Cologne, Toilet Water, Tooth Wash, etc.

Sold only in original packages.

Per gross.

NEILSONIA OVALS.

MOULDS TAKE LETTERED PLATES.

Of the popular oval shape, with the surface fluted so as to present a number of flat faces. These faces reflect the light, and give the bottle and its contents a strikingly brilliant and sparkling appearance.

The slight angles formed by the flutes in no way interfere with labeling.

Sold only in original packages.

ORIENT OVALS.

MOULDS TAKE LETTERED PLATES.

A line of bottles made to contain, at standard weight, the even named capacity measured to base of neck.

As a slight variation in weight above and below standard is necessarily allowed, some of the bottles will hold a little more, and some a little less than name.

All of our other styles of prescription bottles, at standard weight, measure slightly more than the named capacity.

Tall style with rounded back, presenting a smooth surface for attaching label.

Each bottle has its nominal capacity in fluid ounces blown on the face.

Made to order in original packages.

ACME BALL NECK PANELS.

These Bottles are uniform in shape, and are much larger in appearance than the ordinary Ball Neck Panels of corresponding capacity. The panel on one side is oval in form, which adds greatly to the handsome appearance of the Bottles. The moulds are arranged to take lettered plates, so that customer's name, etc., may be blown in the oval panel, leaving the square panel for labeling.

Sold only in original packages.

No. 40 GRADUATED MEDICINE SPOON.

GLASS.

To Measure Tea, Dessert and Tablespoonfuls.

No. 40 per gross, \$13 00

Furnished also with lettering in Spanish.

Two Gross in Original Package.

This Spoon can be furnished in lots of two gross and upward with customer's name, etc., pressed in the glass as an advertisement. The lettering is pressed on the bottom of the spoon, so as to be read from above, but without affecting the smoothness of the bowl inside.

CUSTOMERS MEDICINE GLASSES.

WITH DRUGGIST'S NAME INSERTED.

Much used by Druggists as an Advertisement.

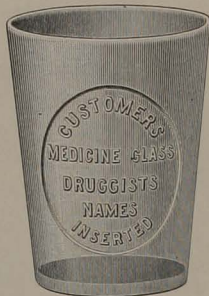

These Tumblers are marked with Tea, Dessert, and Tablespoon Graduations. To insure accuracy, the measurements are made by hand and the Graduations engraved on the glass, not pressed.

Two Gross in Original Package.

No. 7. To measure up to one Tablespoon Per gross, \$14 00

No. 12. To measure up to two Tablespoons 18 00

No. 7 Tumblers also furnished with Lettering in Spanish or Portuguese.

No. 18 MEDICINE GLASS.

WITH DRUGGIST'S NAME INSERTED.

A new style, particularly designed to facilitate the accurate measurement of the smaller doses. The only medicine glass with $\frac{1}{2}$ teaspoonful graduation.

These Glasses are graduated up to two tablespoonfuls. To insure accuracy the graduating is done by hand, and the lines are engraved on the glass, not pressed. They are easily kept clean, as the bottoms are rounded inside, and there are no corners.

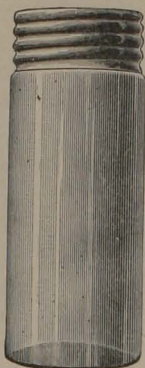

Druggists' names, etc., comprising not more than thirty letters and spaces, can be pressed on the under side of the foot, so as to be read from above, through the glass.

Sold only in lots of two gross, lettered with Druggist's name.

No. 18 per gross, \$18 00

See also Medicine Glasses page 113.

ROUNDED SQUARE RECESSED WARE.

A very handsome style of shelf ware, blown in iron moulds, special care being taken to make the bottles smooth and well finished. They are of Square shape, with Rounded corners; the Recess is oblong, and is carried around to the sides of the bottle, the labels being specially made to conform, so that their edges are protected from injury. As the front of the bottle is flat, the label is shown to great advantage.

GLASS LABELS. FOR SHOP FURNITURE BOTTLES.

See Illustrations, pages 53 and 54.

Lists of Names for Labels are furnished, on application, to parties wishing to order outfits.

The labels are painted with block letters, as shown in illustrations, unless otherwise specified. Any style not listed can be made on receipt of pattern or sample. When labels are wanted to match others already on hand, the fact should be stated and sample sent with the order.

When **labels only** are wanted, if for plain round bottles, give the circumference of the bottles measured at point of attachment; if for recessed ware, state make of ware.

Unless otherwise ordered, the lettering will be in accordance with the U. S. Pharmacopœia, the necessary abbreviations being made.

The prices given are for loose labels, to fit bottles of any size from $\frac{1}{2}$ gallon down, lettered in the usual way. 1 gallon labels, 5 cents each extra, net; 2 gallon labels, 10 cents each extra, net. Lettering in two lines instead of one, 2 to 3 cents extra, net. Any special style of label or lettering, special price.

One cent each, net, is charged for attaching labels.

Labels are not carried in stock, but are painted to order.

PLEASE ORDER BY NUMBER.

All styles of labels are made with square corners when ordered for Recessed Ware.

No.		Each.

0. Oblong, Square Corners. Gold Border, Black Ground, Black Letters on Horizontal Bronze Band	36
2. Oblong, Square Corners. White Ground, Black Letters and Flourishes surrounded by Red Line, Narrow Black Border. See Cut	24

DIRECTIONS FOR ATTACHING GLASS LABELS TO BOTTLES, JARS, ETC.

CEMENT.—To one part of best yellow wax add three of rosin; melt together in an open pan or kettle, with a gentle heat, to the consistency of syrup.

DIRECTIONS.—Place the bottle on a table in a nearly horizontal position; the glass must be perfectly free from moisture. Pour the cement on the hollow side of the label with a spoon; then apply the label to the bottle with a gentle pressure. While the cement is soft form a groove in it by running the point of a knife around the label. This will save labor in chipping it off. It will harden about ten minutes, when with a putty knife such as glaziers use, remove the surplus. Clean bottle and label with a little kerosene oil; wipe off with a damp towel.

For Drawer Pulls and Labels, see pages 176 and 177.

2600. MUSEUM JARS.

FOR PRESERVING AND DISPLAYING SPECIMENS IN MUSEUMS AND EXHIBITIONS.

Patented June 11, 1895, and June 2, 1903.

These Jars are made without contraction at the neck, so that the width of the mouth is the same as the inside diameter of the body of the Jar.

The contents are enclosed entirely in glass, with a thin rubber medium under the lid to make a tight joint. This lid is securely fastened down with a metallic clamp. On the under side of the lid are two glass rings, from which specimens may be suspended so that they will stay in any position.

Lots of not less than one dozen of a size, or three dozen assorted as may be desired, are sold at per dozen prices.

Width of Mouth.	Height without Lid.	Capacity (approximate).	Each.	Per doz.

TOILET SET BOTTLES.

RECESSED WARE WITH GLASS LABELS.

A handsome style of bottle, square with rounded corners. The recess is oblong and is curved around to the sides of the bottle, the label being made to conform, so that its edges are protected from injury. As the front of the bottle is flat, the label is shown to great advantage.

Series 200 and 300
Narrow Mouth.

SERIES 200 AND 300.

With Mushroom Stopper. Label with black block letters in straight line on white background with gold border and bronze pen line.

		Per doz.

DRUGGISTS'
SUNDRIES.

NURSING BOTTLES.

FLINT GLASS.

ONE GROSS IN AN ORIGINAL PACKAGE.

Our Nursing Bottles and Sterilizer Bottles are especially made to stand the hard usage to which such articles are subjected. They are of just the right weights, not so thin as to break easily when dropped, and not so thick as to be liable to crack when exposed to heat or cold. The glass is made of materials which insure the greatest strength and toughness, and is evenly distributed to avoid strain from unequal expansion or contraction. Every bottle is thoroughly annealed, so that it becomes as little liable to crack as an article made of glass can be, and is likely to last a long time even under the most unfair treatment. They are made with sloping shoulders, and are rounded inside, without corners, so that they can easily be cleaned. The mouths and lips are carefully finished to secure smoothness, regularity, and correct size and conformation.

The graduations blown in the glass are formed by the moulds and so cannot be depended on for accuracy.

THE HANDY.

Narrow Mouth.

Graduated.

	Per doz.	Per gross.
6 ounce (sold only in original packages)		\$7 20
8 ounce	\$0 85	8 25

For three cards 4 00

TIP TOP NIPPLE.

Patented November 26, 1912. Also Patented in Canada.

BEST PARA RUBBER. IMPROVED SHAPE, WILL NOT COLLAPSE.

Packed one dozen in handsome display box ; twelve boxes in carton.

Not sold in less than one dozen lots.

Per gross \$7 20

An Attractive Display Card will be Sent on Request.

**TIP TOP NIPPLES
IN SANITARY PACKAGE.**

The Tip Top Nipple is also put up two in a Transparent Sealed Sanitary Packet, insuring delivery to the user in clean and sanitary condition, without exposure to infection through handling.

6 dozen nipples (36 packets) are packed in carton.

Sold only in cartons of 6 dozen.

Per gross \$7 20

With an initial order for one gross or more Nipples in Sanitary Packets, we will send *Free* a Handsomely Labeled Glass Jar, for counter display. The jar will hold 36 packets. The label is lettered in blue on a white enameled background, and the cover handle is a fac-simile of the nipple in glass.

SIMPLEX HYGIENIC NIPPLE.

Patented October 28, 1902.

THE EASIEST TO CLEAN AND SUREST TO BE CLEANED THOROUGHLY.

THE HANDIEST FOR THE CAREFUL.

THE SAFEST FOR THE CARELESS.

The only patented Nipple that can be cleaned thoroughly without turning inside out.

The "Simplex" Hygienic Nipple is smooth throughout, and tapers from bottom to top, so that every part of the interior is in plain view and certain reach.

It affords no hiding place for particles of milk or food, and if desired can be turned inside out as readily as the finger of a glove.

It yields a natural and regulated flow to the nursing child.

1 dozen in box.

1 gross in package.

Not sold in less than 1 dozen lots.

Black Rubber per gross, \$4 00

HOME NIPPLES.

A standard style, made from stock of the highest grade. Of ample weight, strong and elastic.

SIMPLEX SANITARY BREAST PUMPS.

Designed for Comfort and Cleanliness.

The glass is formed to fit the breast comfortably, and give the best results in use. The reservoir is easily kept clean, its position and shape being such that its interior can be reached by the finger. The rubber bulb is firmly attached to the glass by a screw thread, but can readily be removed for washing.

Each in box. $\frac{1}{4}$ dozen in package.

No.		Per doz.
1.	With White Rubber Bulb	\$5 00

Patent applied for.

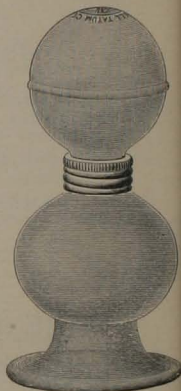

No. 1 W. T. CO. GLOBE BREAST PUMP.

In addition to quality, workmanship and finish, the GLOBE BREAST PUMP offers the following advantages :

1. The "Globe" shape of the reservoir provides a receptacle for the milk, no matter in what position the pump is applied to the breast.
2. The simple yet secure manner in which the bulb is attached.
3. The hygienic features ; bulb readily detachable, and the ease with which the inside of the reservoir can be cleaned.

Each in box. $\frac{1}{4}$ dozen in package.

Per dozen \$7 00

THE WONDER DOUCHE.

Patented May 3, 1904.

Also patented in Great Britain, Canada, Germany and France.

THE BEST AND ONLY PERFECT DOUCHE.

A HYGIENIC NECESSITY FOR WOMEN.

Made of the finest quality rubber, the bulb being soft and elastic. Approximately $\frac{1}{2}$ pint capacity. Total height, 6 inches. Flat bottom. Stands when filled.

EASY TO USE. SANITARY. SAFE.

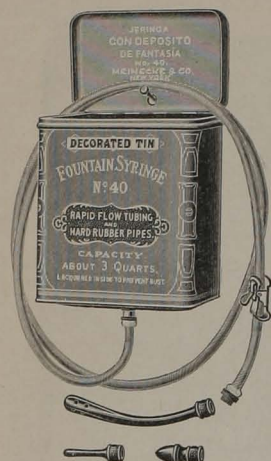

ENDORSED BY PHYSICIANS EVERYWHERE.

The bent neck prevents the injection of air and brings the bulb within easy reach, making the Wonder Douche convenient and comfortable to use when seated in a natural position.

Special attention is called to the entire absence in this syringe of anything at all resembling the ball, balloon or whirling spray, preventives to a thorough douche.

Each in box, $\frac{1}{2}$ dozen in package . . per dozen, \$30 00

No. 40 TIN RESERVOIR FOUNTAIN SYRINGE.

Handsomely decorated Tin Reservoir, approximately 3 quart capacity. 5½ feet White Rubber Tubing with Rolled Ends, Rapid Flow Size. Hard Rubber Rectal and Curved Vaginal Pipes and Nasal Piece, and Metal Shut-off.

No. 38 W. T. CO.
TELESCOPIC POCKET ATOMIZER
AND NEBULIZER.

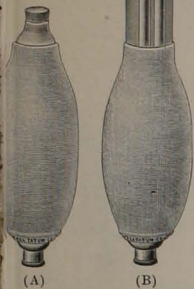

Patented September 26, 1899, and October 28, 1902. No. 25245 of 1902.

The Spray Tubes are made entirely of Glass, and are contained in and form a part of the outer Glass Cylinder, which serves as a reservoir. While this reservoir is designed to hold sufficient for at least one day's treatment, its size and shape are such as to allow of the use of expensive medicaments in small quantities.

The instrument sprays aqueous or oil solutions, and is particularly well adapted for applying Hydrozone, Adrenalin, Suprarenalin, Peroxide of Hydrogen, Iodine, and other preparations that should not come in contact with metal. When the Atomizer is not in use the Cylindrical Glass Reservoir can be pushed into the Bulb, furnishing a good protection for the glass when carried in the pocket.

Shows instrument ready for the pocket.

Shows same ready for use.

Each in box, 1/2 dozen in package . . . per dozen, \$7 00

No. 36 W. T. CO. POCKET ATOMIZER.

Patented August 29, 1899.

Detachable Cap and Nasal Tube of Metal.
Adapted for Spraying Medicinal Oil or Liquids.
Convenient form and size for the pocket.

Each in box, 1/2 dozen in package per dozen, \$3 00

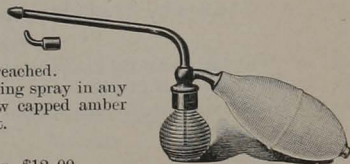

No. 36.

No. 5 THROAT ATOMIZER.

HARD RUBBER FITTINGS.

For Use with Light Oils or Aqueous Preparations.

Specially adapted for use where small quantities of oily remedies are applied. By reason of its length of tube, all parts of the throat and nasal cavities are easily reached. Furnished with Extra Revolving Throat Tip, for throwing spray in any direction at right angles to the tube, and an extra screw capped amber colored glass bottle, for use with liquids affected by light. It is applied with one hand, leaving the other free.

Each in box, 1/2 dozen in package per dozen, \$12 00

PHENIX THROAT ATOMIZER.

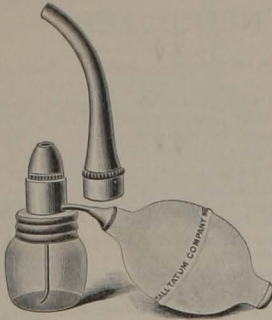

METAL TUBE.

For Use with Light Oils or Aqueous Preparations.

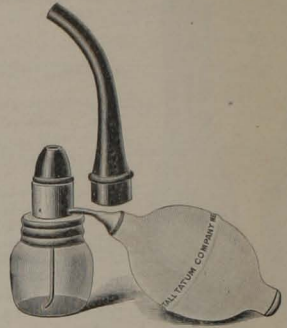

Each in box. 1/2 dozen in package, per dozen, \$10 80

W. T. CO. VASELINE ATOMIZERS.

No. 30.

No. 33.

For Melting and Spraying Vaseline and Similar Ointments,
and Atomizing Medicinal Oils.

Of Superior Material and the Best Workmanship and Finish.

The glass bottles in all our Vaseline Atomizers are specially annealed to stand changes in temperature, so that medicated vaseline or heavy oil can be melted in them, either over a flame or in hot water, and applied to the nose and throat in a fine voluminous spray.

The bulbs are of best quality rubber, elastic and durable. The valve is seated in a neck, and cannot work loose.

All metal parts are substantially nickel-plated. The curved liquid tube will take up the contents of the bottle almost to the last drop.

No. 133.

Each in box. ¼ dozen in package.

No. 100 W. T. CO.

ASEPTIC VASELINE
OR OIL ATOMIZER.

WITH SEPARATE BOTTLE TO CATCH THE DRIP.
AN IMPORTANT IMPROVEMENT.

The contents of this Atomizer cannot become mixed with any surplus oil, possibly containing infectious secretions, which may return into the instrument from the nasal passages. All drip is collected in a small bottle which is attached to the inside of the cap of the large bottle, and which may be removed and emptied when necessary. In this way the medicament to be used remains uncontaminated, infected matter is not sprayed again into the nasal passages, and the danger of communicating diseases, where more than one person use the same instrument, is avoided.

With Detachable Throat and Nasal Tubes of Metal, and Black Rubber Bulb.

Each in box. $\frac{1}{4}$ dozen in package.

Per dozen \$12 00

No. 1
MANHATTAN ATOMIZER.

Continuous Spray. Two Tips.

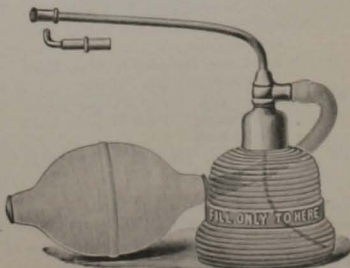

For Use with Light Oils or Aqueous Preparations.

A handsomely finished nickel-plated Screw Cap fitting, with two Detachable Tips, Straight, and Revolving, for throwing spray in any direction at right angles to the tube.

No. 1 EMMET SMITH ATOMIZER AND NEBULIZER.

With Detachable Throat and Nasal Tubes of Metal. White Rubber Bulb.
Metal Parts Nickel-plated and Polished.

Pat. Sept. 11, 1900. No. 13089 of 1902.

This instrument applies Nebulized oils or other liquids without force and with even distribution.

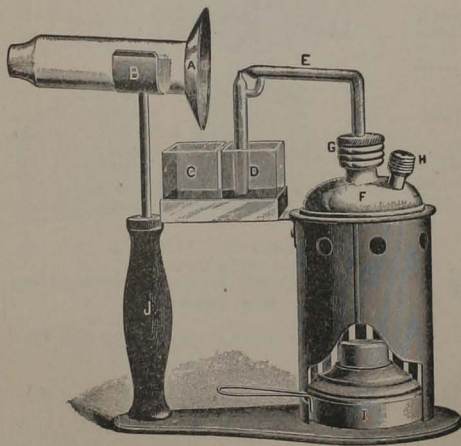

The vapor is developed inside the bottle, and issues from the tube in a voluminous cloud, quite different from the spray of an ordinary Atomizer.

So fine is the subdivision of the medicament that before being precipitated it will pervade the recesses of the lungs and nasal passages as fully as does the breath.

It is so constructed that the liquid will not spill or leak out when the Atomizer is screwed firmly on the bottle, so as to make a liquid-tight joint, and the bottle is not filled above the ring near the base.

Each in handsome box. $\frac{1}{4}$ dozen in package.

Per dozen \$13 50

No. 1 CROUP KETTLE.

For administering Moist Vapor in the Treatment of Croup.
Lacquered Tin. All Seams Double Locked instead of Soldered.

The worth of this indispensable article to families with young children has been many times proven. It is so constructed that the boiler can be replenished without removing the top or otherwise interfering with the treatment. The long tube conveys the vapor to the patient, while the lamp is at a distance sufficiently remote to prevent any danger. It is inexpensive, yet well made—simple, practical, and effective in operation and owing to its compact form is readily portable.

Complete with Spirit Lamp.

Each \$1 80

No. 3.

A sponge, moistened with the medicinal liquid to be used, is placed in the cylinder at the top of the boiler. The vapor, passing through the sponge, is impregnated with the drug before being inhaled by the patient.

No. 3 W. T. CO. STEAM VAPORIZER.

Mass body, and nickel-plated boiler, lamp and tube.
Each \$2 75

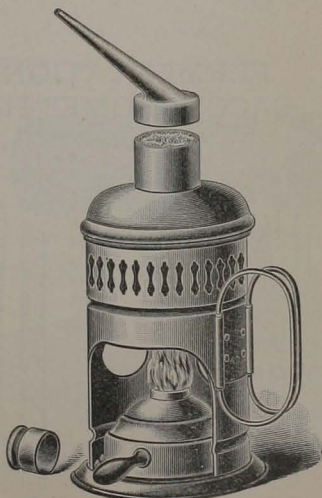

BRONX STEAM VAPORIZER.

PERFECTION BED AND DOUCHE PAN.

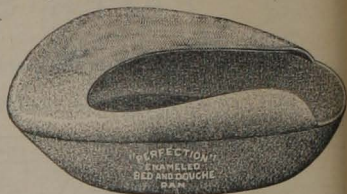

(Meinecke.)

Patented June 5, 1900, and May 4, 1909. Also patented in Great Britain.

ANATOMICALLY CORRECT IN SHAPE. COMFORTABLE, SANITARY, EASY TO EMPTY.

Porcelain.

Enameled.

No other Nursing Appliance of the last decade has met with the approval that has attended the Perfection Combined Bed and Douche Pan. Not only is it used in over 2000 Hospitals, but it is regularly specified by the Medical Departments of the United States Army, Navy and Marine Hospital Service, and also by the great public Hospitals, such as Bellevue and Allied Hospitals of New York City. It is recommended by thousands of physicians and trained nurses everywhere, and its rapidly increasing sale shows that it is gradually displacing almost all other styles of Bed and Douche Pans, both for Hospital and private use.

ADVANTAGES.

It is a **COMBINED** Bed and Douche Pan, intended to be used for both purposes, and has ample capacity.

It is comfortable, because it is shaped to fit the body and causes no pressure against the spine.

It is a sanitary pan without corners and crevices, and having no spout, is easy to empty and clean.

FURNISHED IN WHITE PORCELAIN, AND IN GRAY ENAMELED AND WHITE ENAMELED STEEL WARE.

WHITE PORCELAIN.		GRAY ENAMELED STEEL.		WHITE ENAMELED STEEL.

The small size Pans (Nos. 2, 5 and 6) are for children, but are also suitable for adults when intended to be used simply as Bed Pans, and not as Douche Pans.

PATENT UPHELD.

The Trade is informed that after prolonged litigation the validity of the Meinecke & Co. Patent on the **PERFECTION BED and DOUCHE PAN** has been fully sustained by the U. S. **CIRCUIT COURT** and an injunction issued against and full damages collected from the infringers.

The Trade, for its own protection, is notified that liability for damages is assumed by any one who sells Bed and Douche Pans made in conformity with the **PERFECTION Bed and Douche Pan Patent**, unless stamped with the name "**PERFECTION**" and the patent date, **JUNE 5, 1900.**

TRADE MARK.

BED **SIMPLEX SANITARY** PAN

(Meinecke.)

Patented November 12, 1907. Also patented in Canada and Great Britain.

- No Corners.
- No Crevices.
- No Hidden Recess.

An Ideal Pan
for
Contagious Cases.

Comfortable, and Easily Cleaned.

Every part of the Simplex Sanitary Bed Pan, inside and out, is in plain sight and can be readily reached for thorough cleaning. This feature, which especially fits it for use in contagious cases, will be recognized and appreciated by all physicians and nurses.

It is curved to fit the body, the broad flanges at the sides support the weight of the patient, and all discomfort and spinal pressure are avoided. Its capacity is ample, and its shape prevents tilting when in use.

FURNISHED IN WHITE PORCELAIN, AND IN WHITE ENAMELED STEEL WARE.

White Porcelain	Per doz. \$27 00

WHITE PORCELAIN.

In shape like the French, with wedge end to slip under patient, but without the objectionable and unsanitary spout.

Because of the long opening and wide open end, the "Cleaneasy" is eminently suited for use as a bed pan and urinal combined; the doctor and nurse can have free access to the parts while the patient is on the pan, and it is easily emptied and cleaned.

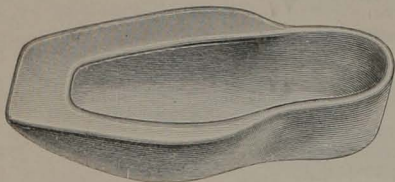

Per dozen \$27 00

PAT. AUG. 16, 1910.
ALSO PAT. IN GREAT BRITAIN AND GERMANY

No. 15 W. T. CO. ACME BED PAN.

WHITE PORCELAIN.

Of improved shape, designed especially for the comfort of the patient. May also be used as a Douche Pan.

Approximately 15½ inches long and 10½ inches wide, with opening 7 x 12½ inches.

MEINECKE INVALID WATER CUSHION.

BEST MAROON RUBBER.

Patent Applied For.

Soft, Comfortable, Cool. For Preventing and Relieving Bed Sores.

The Meinecke Invalid Water Cushion is filled with cold water, and then used in exactly the same way as any other Invalid Ring or Cushion.

The advantages of a Water Cushion over an Air Cushion will be evident to all physicians and nurses. An Air Cushion is hard and uncomfortable, and after the patient has been on it for a little while it becomes warm, and the tender spot is liable to be irritated rather than soothed.

The Meinecke Water Cushion is cool, comfortable and soft to the part resting on it, and it can be refilled from time to time, whenever the heat from the body makes the water in the Cushion warm.

It is particularly suitable for use under the end of the spine, the shoulder blades, the hip joints, or, in fact, any part of the body which is apt to become sore and tender from continued lying in one position. It is also useful as a head support, the back of the head resting in the opening.

This Cushion, if filled with warm water, also makes an excellent face and ear bag for relieving facial neuralgia, earache and toothache, and some forms of headaches requiring the application of heat.

Length, not including funnel or grommet, 11 inches ; width, 8 inches.

Diameter of opening, 3½ inches.

A Washable Cover is Supplied with Each Cushion.

Each in box. ¼ dozen in package.

**SAFETY METAL HOT WATER BOTTLE AND FOOT
AND BED WARMER.**

(MEINECKE.)

The "Safety" can always be relied on as ready for service, being practically indestructible if not abused. It will not rust, corrode, or deteriorate through age, being made of strong brass, heavily nickel-plated outside and lined inside with block tin, with joints clinched and soldered. If desired it can be used with boiling water. The large oval funnel renders it easy to fill without scalding, and it is provided with a handle for carrying. Fitted with Holdfast Unlosable Stopper.

Size, 12 x 6 x 1 $\frac{1}{2}$ inches.

Capacity, nearly two quarts.

Design Patent No. 34116.
Additional Patent Applied For.

Each	\$4 00
----------------	--------

MOULDED WATER BOTTLES.

To meet the wishes of those who desire Water Bottles made without seams, we offer the *Everlast* and the *Reliance* lines. While their prices are comparatively low, we believe these goods, grade for grade, to be equal in quality to any Moulded Water Bottles made, and we guarantee to replace any of either style that may be found defective from fault in manufacture.

While we offer these bottles with entire confidence, we cannot join with those who claim that a Moulded Bottle, without seams, is in any way superior to one made by hand in the usual way. The defects in manufacture which most frequently appear are, overcuring, which destroys the strength of the rubber, and "pin holes," caused by the working out of small pieces of foreign matter, which, through imperfect washing, have not been removed from the crude rubber. These defects are as likely to occur in moulded as in hand made bottles. The seam of a properly constructed hand made bottle is usually its strongest part, and in the lines that we offer it is extremely seldom that a leak develops at this point.

**W. T. CO.

PERFECTION HOSPITAL ICE BAGS.

(Meinecke.)

Adopted by Leading Hospitals and by U. S. Army and Navy.

The Perfection holds more ice than any other bag of its apparent size. It has a smooth bottom and no creases when filled, and can be turned inside out. The bag is fitted with loops for the attachment of a bandage, and can be adjusted and secured to any part of the body. Its long flat surface makes it especially adapted for applications to the chest or abdomen, for which purpose the large size is recommended. For general use the medium size is preferable.

Pat. Oct. 16, 1900, and Jan. 23, 1906.
Also Pat. in Great Britain.

Of Finest Quality Maroon Rubber, with Top Reinforced with Cloth Insertion. Metal Screw Cap Fitted with Unlosable Rubber Washer.

	Per doz.

Length, 9 inches per dozen, \$16 50

Pat. Jan. 23, 1906, and April 27, 1909.

ARMY AND NAVY COMBINATION ICE BAG AND HELMET.

(Meinecke.)

BEST MAROON RUBBER. CLOTH INSERTION. WITH
SCREW-CAP AND UNLOSABLE WASHER.

Patented November 21, 1905, and January 23, 1906.

Fig. 1.

Fig. 1 shows how the Helmet may be flattened out so as to form a regular round-shaped Ice Bag, suitable for use on any part of the body. When flattened out, the adult's size measures 12½ inches in diameter, thus making an admirable Ice Bag for application to the abdomen. The child's size measures 10 inches in diameter when flattened out.

Fig. 2 shows how the flat Ice Bag may be shaped into a Helmet.

Fig. 3 shows the Helmet in use. It fits the head perfectly, and is sufficiently large to hold an ample quantity of ice.

Fig. 4 shows how the ice in Helmet may be centered over the base of brain when desired. This is an important feature—the mobility of the ice. The ice can be moved to any part of the head, as there are no obstructions on the inside of Helmet to prevent the free movement of the ice.

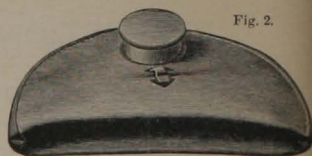

Fig. 2.

“IDEAL” SURGEONS’ BANDAGES.

THE “IDEAL” BANDAGE

A NEW ELASTIC BANDAGE WITHOUT ANY RUBBER

The Ideal Bandage is made entirely of cotton. Its elasticity is due to the peculiar weave of the individual threads. It can be rolled evenly, and reversing is unnecessary.

The continual and even pressure given by the Ideal Bandage makes it desirable for use in all cases where a rubber or flannel bandage would be indicated. For the treatment of varicose veins and ulcers, an abdominal bandage in pregnancy, and for bandaging limbs and joints, it is superior to any other bandage made. It is of signal value in building up the stump after amputation. Being porous, it allows perspiration to evaporate freely, thus insuring a natural condition of the skin.

The Ideal Bandage may be washed freely, as washing adds to its elasticity.

Dr. Adolf Lorenz, the famous Vienna surgeon, wrote:

“I used them for my operations on my American tour, and am very pleased to say that I consider them far superior to the flannel, elastic or any other bandage I heretofore used.”

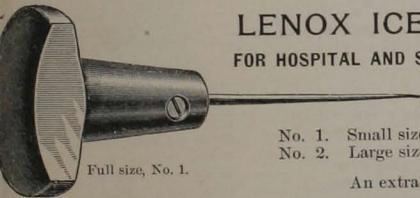

Each Bandage measures 5½ yards in length when stretched.

Width.	Per doz.	Width.	Per doz.

MEINECKE ASEPTIC OPERATING PADS.

(Whitall Tatum Company, Proprietors.)

Without Crevice. Easy to Clean. Aseptic and Sanitary.

OPEN STYLE.

Made in Three Sizes:
Nos. 15, 20 and 24.

Pat. June 14, 1904, and
Nov. 14, 1905.
Also Valve Pat. Nov. 22, 1904.

The dotted lines in cut of Open Style Pad show how the drainage apron hangs when not hooked together, the raised edges forming a gutter and preventing the fluid from running off at the sides.

IMPROVED FEATURES.

Unlike the old style Kelly Pads, these new Aseptic Operating Pads have no crevice under the inflated portion. Every square inch of the Pads may therefore be reached with a scrubbing brush. This permits them to be kept aseptic. Every surgeon will appreciate this improved feature. They are all now fitted with our Patented Valves, which are entirely covered by air-tight Hard Rubber Caps. These caps prevent all injury to the valves while the Pads are being sterilized.

WIDELY USED.

Because of their aseptic features, they have been officially adopted for use in the U. S. Army and the U. S. Navy. Hundreds of hospitals have adopted them.

QUALITY.

Heavily made of the best Para rubber. Will outwear any of the old style Kelly Pads.

THE IDEAL PAD FOR GENERAL SURGERY AND FOR OBSTETRICAL PURPOSES.

SECTIONAL VIEW.

Full Directions Accompany Each Battery.

No. 1 MYSTIC DRY CELL FARADIC BATTERY.

FOR FAMILY USE.

A most compact and serviceable little battery. A new device is employed to start the current. The opening of the cover releases a spring which completes the circuit, setting the battery in action. Reversely the closing down of the box lid will stop the battery. The controlling spring may also be turned so as to stop the battery without closing the lid if this be desired.

Shocks may be given by alternately pressing down and releasing the spring switch, repeating as often as desired, while the battery is in action.

The case is of polished oak, 7 $\frac{3}{4}$ x 3 $\frac{1}{2}$ inches, with an arrangement in the cover for holding the following electrodes: one pair 3 foot silk covered cords, two metal shells, one wood handle, one sponge covered disc and one foot-plate.

Each \$5 00

No. 1 IDEAL DRY CELL FARADIC BATTERY.

Patented June 2, 1908.

FOR FAMILY USE.

This instrument is encased in a polished oak box of unique design, 9 $\frac{3}{4}$ x 5 $\frac{3}{4}$ inches, with a compartment arranged in the cover to hold the following electrodes: one pair 3 foot silk covered cords, two metal shells, two wooden handles, two sponge covered discs and one large foot-plate.

The cover also contains our simple circuit breaking device—by which the battery is shut off with the closing down of the cover.

Each \$7 00

PROGRESS CLINICAL THERMOMETER.

(Meinecke.)

With Triangular Top.

One Minute.

Magnifying Front.

PATENTED AUGUST 2, 1904.

Each Thermometer has Certificate of Accuracy.

The Triangular Top prevents rolling, and permits of firm grip when shaking down the mercury. The two arrows on the mercury line assist in finding the column.

The case is provided with a screw cap at each end, to facilitate removing and replacing the cotton packing.

Fahrenheit Scale Only.

4 inch, in Progress Hard Rubber Case per dozen, \$15 00

The Progress Clinical Thermometer can be furnished lettered with customer's name, in lots of three dozen, without extra charge.

No. 400 ASEPTIC CLINICAL THERMOMETER.

Magnifying Front.

Fahrenheit Scale Only.

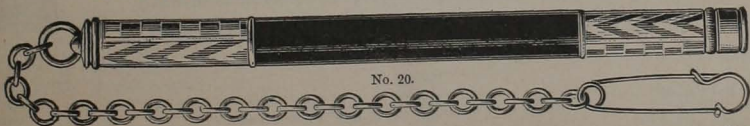

We are offering at the extremely low price noted below a direct importation of German made "Aseptic" Thermometers. The mercury tube and engraved glass scale being encased in glass, the instrument may be thoroughly sterilized.

No. 400. 4 inch, in Metal Case per dozen, \$7 20

We make a special point of seeing that all Clinical Thermometers sent out by us are in perfect condition and use the greatest care in packing them. The goods, from their nature, are very fragile, and we cannot hold ourselves responsible for any breakage or damage that may occur after they leave our hands.

No. 36 W. T. CO. HYPODERMIC SYRINGE.

FOR LIQUIDS OR TABLETS.

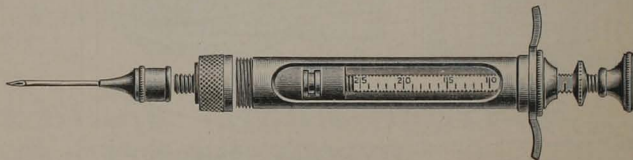

Fenestrated Metal Cylinder, with Finger Rests. Glass Barrel. Graduated Piston-Rod.
In Morocco Case with Hinged Lid.

Complete, with Vial and two Needles, universal thread per dozen, \$15 00

W. T. CO. DETACHABLE PISTON-HEAD HYPODERMIC SYRINGES.

FOR LIQUIDS OR TABLETS.

Fenestrated Metal Cylinder, with Finger Rests. Glass Barrel. Graduated Piston Rod.

A special feature of this Syringe is the device by which, when it becomes necessary to renew the packing of the piston, the rod may be unscrewed from the head, and the latter, together with the glass barrel, removed from the frame, and a new barrel, with piston-head already adjusted to it, inserted in its place. It is therefore unnecessary to return the syringe for repairs, and it may be kept in use until the new barrel and packing have been received.

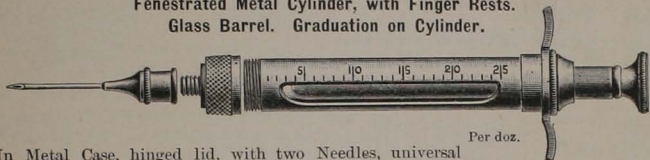

Glass barrels, with piston-heads adjusted to fit, are kept in stock, and will be forwarded by mail at a cost of fifteen cents each, net.

ALUMINUM SQUARE WEIGHTS.

	Per set.
10 grains to $\frac{1}{2}$ grain	\$0 80
500 milligrams to 10 milligrams	50

GLASS SCALE PANS.

	Per pair.
$2\frac{1}{2}$, $2\frac{3}{4}$ or 3 inches in diameter	\$0 90

GRADUATES.

In all our graduating work the Liter of the International Bureau of Weights and Measures is taken as the unit of volume, in accordance with the requirements of the Pharmacopœia.

With the aid of apparatus specially devised and controlled by ourselves, we are able to insure absolute freedom from error. In no case is mechanical division employed, but every line on each graduate is determined independently and with the same accuracy. Every graduate is carefully tested after graduation.

OUR GUARANTEE OF ACCURACY IS ETCHED ON EVERY GRADUATE.

The entire line is approved by the New York City Bureau of Weights and Measures.

The principal lines on all Graduates except the "Duplex" and sizes under $\frac{1}{2}$ ounce, extend entirely around the glass, so that a level can be obtained without difficulty. All readings are to be made at the bottom of the meniscus.

The Phenix, Acme and Keystone Graduates are made to deliver the quantities indicated, and are standard at 15° C. (59° F.).

PHENIX GRADUATES.

For over thirty years these Graduates have held their place as the standard of excellence. They are light and strong and of brilliant finish. The lines are clear-cut and distinct, and the figures and letters are handsomely engraved by hand.

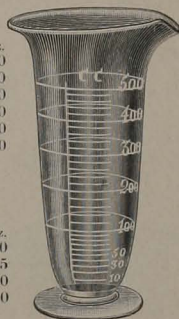

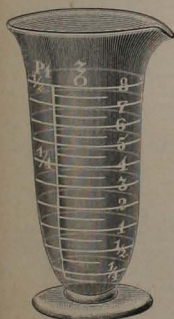

CONE SHAPE.

APOTHECARIES' FLUID MEASURE.

No. 1 W. T. CO. SUPPOSITORY MACHINE.

For Making Suppositories by Cold Compression.

The machine is simple in construction, durable, and rapid in operation. It is furnished with mould adapted for making three sizes of Suppositories, 15 grain, 25 grain, and Vaginal.

Each	\$6 00
----------------	--------

No. 3 W. T. CO. SUPPOSITORY MACHINE.

Compact and Simple in Construction. Easily and Quickly Operated.
Will make Solid and Smooth Suppositories.

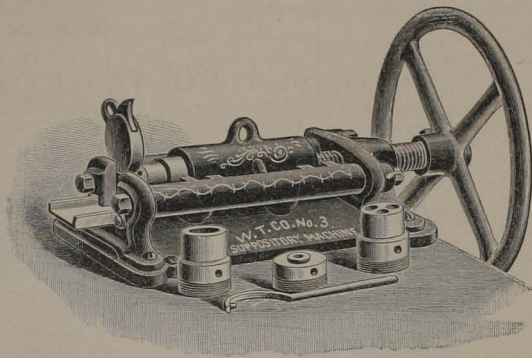

The use of this machine does away with the old method of melting the ingredients used in making Suppositories. After thorough mixing, the mass is placed in the cylinder, and a few turns of the wheel will deliver suppositories formed by cold compression.

Each machine is furnished with set of moulds for making Suppositories of three sizes—15 grain, 30 grain, and Vaginal, and with six moulds for making bougies or forming pill mass into rods.

The moulds are of brass, and are screwed into the end of the cylinder. They can be easily and rapidly inserted or removed.

Complete, with Nine Moulds each, \$18 00

The diameters of bores in set of Pill and Bougie Moulds are $\frac{3}{8}$, $\frac{10}{32}$, $\frac{12}{32}$, $\frac{14}{32}$, $\frac{15}{32}$ and $\frac{20}{32}$ inch.

No. 10 W. T. CO. TABLET MOULD.
HARD RUBBER. FOR MAKING 50 ONE-GRAIN TRITURATE TABLETS.

The Druggist who is often called upon to furnish physicians with Triturate Tablets, will find this little article invaluable. The rapidity with which it can be operated makes it a time and labor saver, and its use obviates the necessity of carrying a large line of tablet triturates for many of which the demand is infrequent.

Each \$3 50

No. 25 W. T. CO. TABLET MACHINE.

Height, 10½ inches.

Designed for filling prescriptions in tablet form. Its use obviates the necessity of carrying in stock lines of tablets the demand for which is limited.

The depth of the mould is regulated by means of a screw, so that after weighing out the powder for one tablet and adjusting the mould so that it will just contain the powder before compression, the tablets will be made of uniform weight and thickness by simply filling the mould to the top for each tablet.

When the lever is thrown back, the lower die is automatically raised, discharging the tablet. It then recedes to its former position and the mould is ready for refilling.

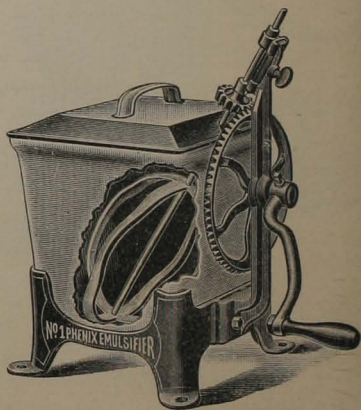

Each machine is furnished with two sets of moulds and dies, making tablets respectively of $\frac{5}{16}$ and $\frac{9}{16}$ inch diameter, and of thickness as required.

Each \$18 00

PHENIX EMULSIFIERS.

Japanned Iron Frame. Detachable Porcelain Tank. Tin Lid. Galvanized Iron Dasher of Improved Shape.

The Tank can be readily removed from the Frame, facilitating emptying, cleaning, etc.

JONES' IMPROVED MIXER AND SIFTER.

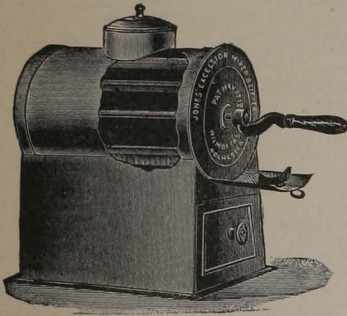

A simple, durable, practical machine for the mixing, compounding and triturating of all powders intended for manufacturing and compounding Baking, Tooth, Dyspepsia, Talcum, and Seidlitz Powders.

It mixes the powders thoroughly, rubbing out all lumps, and forcing the material through a sieve.

The front head is removable, and the machine, which is all metal, can be washed and cleaned from any powder in five minutes.

The powder is sifted into the tin drawer when the tin slide under sieve is removed.

Each Mixer is furnished with two brass wire sieves, 20 and 50 mesh. Sieves of other textures furnished to order at extra price.

No.	Capacity.	Each.
1.	6 pounds	\$7 50
2.	10 pounds	10 00
3.	25 pounds	15 00

No. 1 PRESCRIPTION SIEVE.

NICKEL-PLATED. MADE IN THREE PARTS, AS SHOWN IN CUT.

The powder to be mixed and sifted is placed in the upper compartment, and shaken through the wire sieve into the lower compartment, the apparatus being meanwhile completely closed, so that none of its contents can escape.

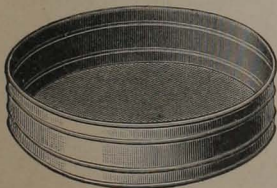

Dimensions, 5½ x 3 inches. 50 mesh sieve.

Each \$1 00

PHENIX HERB CANS.

The advantages of using Metal Containers for such Drugs as were formerly kept in drawers will appeal to every druggist. These cans are practically dust and moisture proof, and a positive safeguard against mice and insects. They are made of heavy tin, japanned of a rich olive-green color, with gold lines at top and bottom. The lids are hinged and cover the entire top of can, providing free access to the contents. The labels are held in place by neat brass frames, which are detachable.

PHENIX DISPENSING TANK.

IMPROVED FORM WITH
DETACHABLE TRAY.

Patent applied for.

The Tray, being held in place by a spring catch, may easily be removed, allowing free access to the interior of the Tank for thorough cleaning.

For dispensing heavy oils, etc., in a cleanly and convenient manner. Bottles are filled directly from the pump spout, and all drip returns to tank. The cover is hinged, and fits snugly, excluding all dust. The tank is made of heavy sheet tin, handsomely decorated, and is built to give satisfaction in continual service.

Furnished unlettered or lettered—either *Oleum Olivæ*, *Oleum Ricini*, *Glycerinum*, or *Turpentine*.

2 gallon each, \$3 30 .

Names other than the four given above can be painted on the cans at a cost of 25 cents each, net.

5-GALLON DISPENSING TANK.

A round Tank, with hinged cover and side handles, and fitted with Pump and Detachable Tray similar to those used in our Phenix Dispensing Tank. It is neatly painted in dark green with gilt trimmings, and can be lettered with the name of the contents when desired.

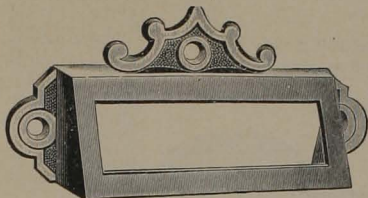

Each, including lettering \$6 75

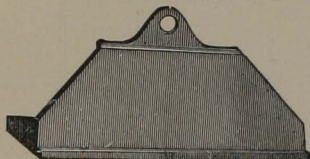

Complete.

IMPROVED DRAWER PULL.

The cut shows the Pull complete. Section 1 is the face of the Pull, which is fastened to the drawer by two screws (one at each end). Section 2 with label laid on it is then pushed up under Section 1 until the screw holes at the top of both are opposite, when it is fastened by a screw going through both plates. Labels can be removed and changed by taking out the top screw, and without removing the face of the Pull from the drawer. This arrangement gives the Pull a solid iron back, so that the glass label is protected, and also gives a larger space for the hand.

Section 1.

Section 2.

Bronzed. $4\frac{1}{2}$ x 2 inches per dozen, \$1 80

The price does not include Labels, for which see page 177.

No. 49 A AUTOMATIC NUMBERING MACHINE.
FOR NUMBERING PRESCRIPTIONS.

123456

FAC SIMILE IMPRESSION

This Machine will print numbers in duplicate, changing automatically after producing each set; will print consecutive numbers, or repeat the same number indefinitely.

It prints from engraved steel figures, which give a clean-cut impression, and will not wear out and become indistinct. An accurate gauge plate enables the operator to print numbers exactly where they are wanted.

By a self-acting device the figures are freshly inked after each movement of the machine.

Capacity, 1 to 999,999.

Each \$5 00 net.

Unless otherwise specified, Black Indelible Ink is supplied with this Machine. Red or Blue Ink, or Copying Ink furnished if desired.

W. T. CO. FILTER PAPER.
WHITE AND GRAY.

This paper has for years stood the test of use in many of the largest laboratories in the country, and to an almost universal extent by the drug trade. It is unsurpassed in strength, uniformity of texture, and clear rapid filtering, and is especially adapted for pharmaceutical and qualitative work, as well as for general manufacturing purposes.

W. T. CO. CORKS.

Particular attention is called to our Special Brands of Corks, which are supplied in three grades. They are of extra length, and are specially selected for our purpose, and we guarantee their quality. The Red Seal and Bulls-Eye Brands are particularly

adapted for use in prescription bottles. The Acorn Brand will meet the wants of those who desire Corks of good quality but low in price. The high standard of excellence which has made these brands so popular with the trade will be fully maintained.

GOLD SEAL BRAND. Extra Long.

Equal to any Homeopathic Cork in the market. Every cork is selected with its small end smooth or clean, and is made from the finest grade of Portugal Cork-wood. The velvety nature of this wood, and the improved machinery with which the corks are cut, give them their smooth, "velvet" finish.

In ordering, specify size of corks wanted.

W. T. CO. RUBBER STOPPERS.

These stoppers are approximately of same dimensions as the corresponding numbers of "Red Seal" and other Corks, as shown in diagram, page 183.

They are of a light slate color, and of better quality than the White Rubber Stoppers usually sold, being of softer stock and not so liable to become hardened with age.

ICE CREAM LADLES.

By a mechanical attachment, easily operated by the hand holding the ladle, the ice cream is detached from the bowl, and may be readily dropped into the glass.

A special feature of these ladles is the ease with which they may be taken apart for thorough cleaning.

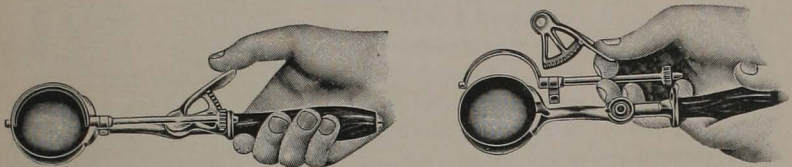

No. 30 ICE CREAM LADLE.

The mechanism for detaching contents from bowl is actuated by tightening the grasp on the handle of the ladle.

16 to quart each, \$3 00 | 20 to quart each, \$3 00

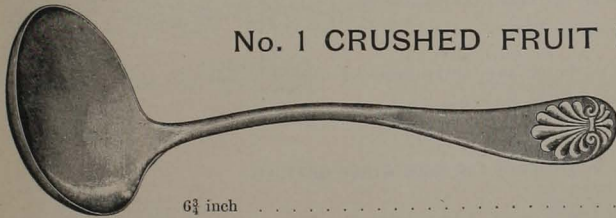

No. 31 ICE CREAM LADLE.

Operated by the thumb of the hand holding the ladle.

16 to quart each, \$3 00 | 20 to quart each, \$3 00

LEMON SQUEEZER.

Operated by one movement of the lever—Rotary Plunger—by which the pulp of the lemon is thoroughly crushed and all the juice extracted.

Nickel-plated, Aluminum Cup . . . each, \$5 40

No. 70.

No. 1 GLASS WASHER.

The washer, when submerged in a pail or other vessel of water, provides a convenient means for cleansing glasses at the Soda Fountain. The outer brushes may be adjusted to fit glasses of various sizes.

Each, without container \$5 00

No. 1 Glass Washer.

No. 3 TUMBLER BRUSH.

Cleans both sides of the glass at the same time, or both brushes can be used on the inside of the glass.

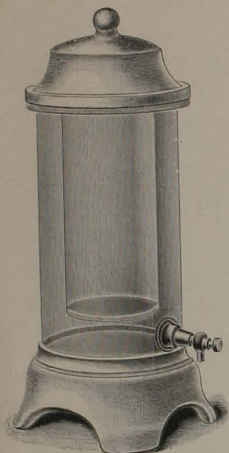

Per dozen \$4 80

No. 3 Tumbler Brush.

**W. T. CO.
IMPROVED DUPLEX COOLERS.**

Patented October 14, 1902.

OUTER AND INNER
JARS OF GLASS.

WHITE PORCELAIN BASE.

WHITE ENAMELED LID.

NICKEL-PLATED STOP-COCK.

These Coolers can readily be kept clean and attractive. They are so constructed that the ice does not come in contact with the liquid. The outer jar or liquid container is easily filled through the opening in the metal collar without removing the ice receptacle. A weight is provided to hold the ice jar in position should it show a tendency to float. The stop-cock is of an improved pattern, and very easily operated.

	Each.

Frigidor

FOR KEEPING WATER COLD, PRESERVING
CRACKED ICE, ETC. USEFUL IN THE HOUSE
OR HOTEL—INDISPENSABLE IN THE SICK
ROOM AND HOSPITAL.

Greatly Improved in Appearance by the Adoption
of a New Aluminum Finish.

The perfected shape of the mouth of the glass jar per-
mits of pouring the contents cleanly, without drip.

A glass jar, capacity one quart, is enclosed within a handsomely finished double-walled container, zinc lined, so constructed as to be a non-conductor of heat.

A closely fitting cover protects the contents from all impurities.

Liquid may be poured from the jar while it is in place in the container, the latter being furnished with a folding handle.

When the Frigidor is closed the temperature inside will change very slowly. Ice placed in the jar will remain unmelted for many hours, and iced water, placed therein on retiring, will be found cold and palatable in the morning.

Owing to its non-conducting quality, the Frigidor is also well adapted for retaining the heat of broth, gruel or other food placed in it when hot.

The Frigidor is no experiment; nearly twenty years' satisfactory service has proved its worth. It is simple, economical, practical and effective. It is thoroughly sanitary, as the cover excludes air and dust, and all parts can be readily reached with the hand for thorough cleaning.

Each in box, complete.....per dozen, \$18 00

Glass Jar only.....per dozen, 2 40
